

# September Newsletter

Our camping trip is fast approaching! Our students have been planning and organizing activities, food, and logistics. Stay tuned for more information!

## Discover This Week

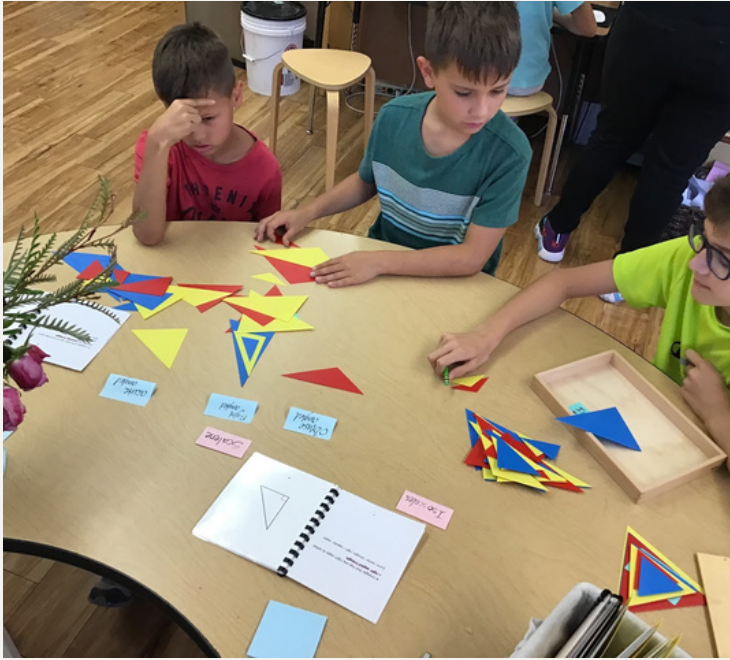

Our students have been finishing up their persuasive essays. We finished with the last of the great lessons, including the history of our alphabet and the history of numbers. Many students have been researching the Greeks, Phoenicians, and Mesopotamian number and letter systems, including a presentation on the cars in Carthage.

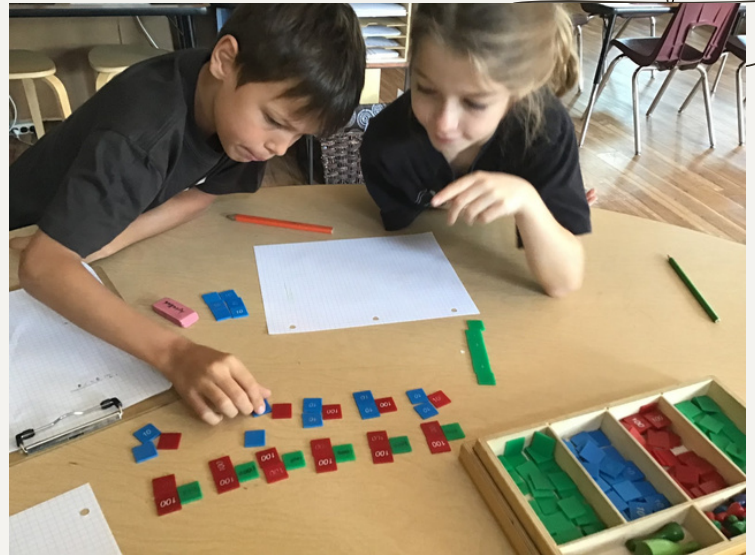

# A Look Inside

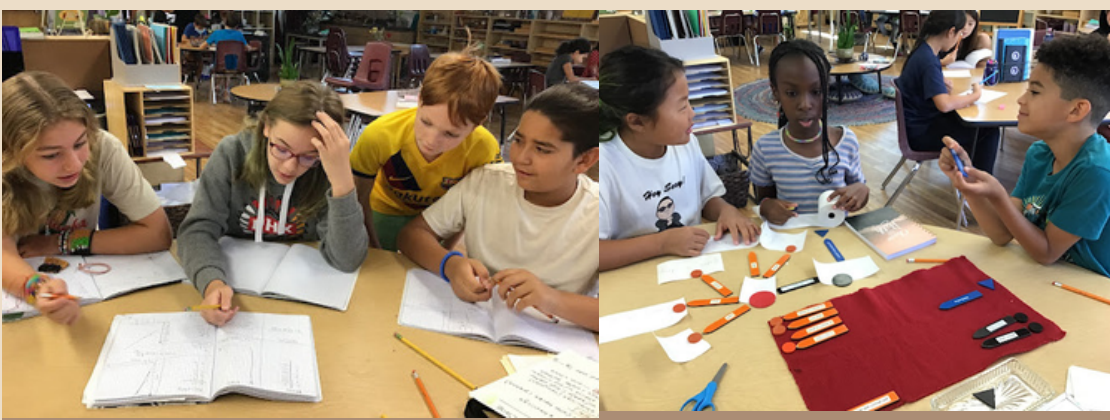

Cosmic Education is all about exploration across disciplines. Group work allows children to build academic knowledge and emotional intelligence in the same activity. Our new students are becoming familiar with the higher expectations found in upper elementary as well as familiarizing themselves with new friends to work with. Many are developing a sense of urgency to learn new things.

Operations with integers

Double digit group division

# Upcoming News

We are already preparing for our future DC trip in subtle ways as children are given history lessons and exploring facts about our constitution.

In September and October we will embark on further research into US History and will present this important information in conjunction with the other upper el classrooms. More details to follow!

HAPPY AUGUST BIRTHDAYS TO OUR 6 STUDENTS, 3 OF WHOM SHARE THE SAME DAY!!
